6A female contacts for female inserts with terminal Ø 1 mm		CDFA 6A	CDFD 6A
6A male contacts for male inserts with terminal Ø 1 mm		CDMA 6A	CDMD 6A

- c  us (ECBT2.E115072, ECBT8.E115072) 
EAC certified
- CQC, BV pending

CIF interface

The interface block is made according to the multipole connector used by assembling a suitable number of CIF modules (see table).

inserts	poles	modules "CIF"
series	n°	n°
CDD	24	4
CDD	42	7
CDD	72	12
CDD	108	18
CX	8/24	4
CX	6/36	6
CX (MIXO)	12	2

The block is then soldered on the printed circuit on which the multipole connector (female or male) equipped with coupling contacts will then be inserted.

CCMFA

16 A male contacts for male inserts

- CE marked (ECBT2.E115072, ECBT8.E115072) DNV
- ENEC certified
- CQC, BV pending

The block is soldered on the printed circuit on which
the multipole connector (female or male) equipped with
coupling contacts will then be inserted.

NOTE:
This PCB interface connector foresees the protective
earth connection (PE) of the corresponding CQ 08
connector to be pass-through.
For this purpose, a Ø 6,4 mm hole is foreseen in the
PCB layout in correspondence of the PE contact.

TECHNICAL FEATURES

CIF Q12 2.4 - CQF 12 CIF /CQM 12 CIF

CIF Q12 2.4 (with 12+ Ⓢ gold plated contacts)

NOTE – CIF Q12 2.4A (with 12 + Ⓢ silver plated contacts) available upon request.

Special CQ 12 inserts for PCB adapter:

- CQF 12 CIF
- CQM 12 CIF

with PE contact equipped with rear Ø 1 mm pin for mating with the PE contact of the PCB adapter.

CIF interface contacts for CQF /M 12 CIF:

- CDFA 6A28 (female contact, silver plated, with rear Ø 1 mm pin for mating with the PCB adapter)
- CDMA 6A (male contact, silver plated, with rear Ø 1 mm pin for mating with the PCB adapter)

NOTE – Gold plated variants of the interface contacts CDFD 6A28 and CDMD 6A available upon request.

The new PCB adapter **CIF Q12 2.4** (gold plated contacts, available on request **CIF Q12 2.4** with silver plated contacts) allows cable-to-PCB connection with CQ 12 – 12P+ Ⓢ industrial heavy-duty connector inserts for power electronics and/or signal applications, to reduce wiring costs (where “large numbers” justify the development of a PCB design).

Due to the contact pitch and the layout pattern on the PCB, a reduction of rated voltage for CQ 12 is required from 400/690V to 250V.

The **CIF Q12 2.4** PCB interface adapter is suitable for printed circuit board application by soldering to PCBs with thickness up to 2,4 mm.

The special variants of **CQ 12** inserts that mate on this adapter:

- CQF 12 CIF
- CQM 12 CIF

feature the PE contact with Ø 1 mm pin instead of the usual screw terminal, for mating with the PCB adapter. This PE contact provides protective earth connection to a metal housing. These inserts are therefore suitable for any kind of bulkhead mounting “21.21” enclosure (insulating, metal).

In such special inserts it is necessary to use special interface contacts:

- for female CQF 12 CIF: **CDFA 6A28** female, silver plated, with rear Ø 1 mm pin for mating with **CIF Q12 2.4** PCB interface adapter;
- for male CQM 12 CIF: **CDMA 6A** male, silver plated, with rear Ø 1 mm pin for mating with **CIF Q12 2.4** PCB interface adapter.

The above special contacts are available on request with standard gold plating as **CDFD 6A28** and **CDMD 6A**.

Each of the above special inserts, to be mated respectively by a corresponding standard insert of opposite gender (**CQM 12** or **CQF 12**, see Assembly Instructions on page 91), can be equipped, together with their mating counterpart, with 2 **coding pins CR Q12**, allowing up to 16 different codings (see page 689 of CN.19 catalogue), to avoid unintended mating in case of multiple of these connectors installed nearby on the same PCB.

Connectorization allows minimisation of downtime in factory automation due to easy replacement of modular PCB circuitry (easier and faster maintenance).

NOTE: In cable-to-PCB connection applications, safety does not depend only on the designs of the adapter and of the corresponding connector, it depends also on the design of the PCB and of the equipment – e.g. its enclosure and relevant spacings if metallic – where the PCB circuit and the cable to board are employed; hence, no **CE** marking (nor the conceptually equivalent Eurasian Conformity mark EAC) can be applied on the PCB adapters, even if by rated voltage they fall under the scope of the Low Voltage Directive 2014/35/EU.

Technical characteristics

Number of contacts: 12 + Ⓢ

EN/IEC 61984 ratings: **7,5 A 250 V 4 kV 3**

Lower and Upper Limiting Temperatures (LLT, ULT):
-40 °C ... +125 °C

NOTE – The adapter insulating material is able to withstand wave soldering of the PCB.

TECHNICAL FEATURES

CIF Q07 2.4

CIF Q07 2.4 (with gold plated contacts)

NOTE – CIF Q07 2.4A (with silver plated contacts) available upon request

CIF interface contacts:

- **CDFA 6A28** (female contact, silver plated, with rear Ø 1 mm pin for mating with the PCB adapter)

- **CDMA 6A** (male contact, silver plated, with rear Ø 1 mm pin for mating with the PCB adapter)

NOTE – Gold plated variants of the interface contacts CDFD 6A28 and CDMD 6A available upon request.

This new **CIF Q07 2.4** adapter (with gold plated contacts, available upon request with silver plated contacts **CIF Q07 2.4A**) allows cable-to-PCB connection with CQ 07 7P+⊕ industrial heavy-duty connector inserts for power electronics and/or signal applications, to reduce wiring costs (where “large numbers” justify the development of a PCB design).

The **CIF Q07 2.4** PCB interface adapter is suitable for printed circuit board application by soldering to PCBs with thickness up to 2,4 mm.

Due to the contact pitch and the layout pattern on the PCB, a reduction of rated voltage for CQ 07 is required from 400V to 250V.

For the connection to the PCB adapter of **CQ 07** inserts it is necessary to equip these standard inserts with **special interface contacts** (except the PE contact, embedded in the insert, and screw-type):

- for female CQF 07: **CDFA 6A28** female, silver plated, with rear Ø 1 mm pin for mating with **CIF Q07 2.4** PCB interface adapter;
- for male CQM 07: **CDMA 6A** male, silver plated, with rear Ø 1 mm pin for mating with **CIF Q07 2.4** PCB interface adapter.

Connectorization allows minimisation of downtime in factory automation due to easy replacement of modular PCB circuitry (easier and faster maintenance).

NOTE: In cable-to-PCB connection applications, safety does not depend only on the designs of the adapter and of the corresponding connector, it depends also on the design of the PCB and of the equipment – e.g. its enclosure and relevant spacings if metallic – where the PCB circuit and the cable to board are employed; hence, no **CE** marking (nor the conceptually equivalent Eurasian Conformity mark EAC) can be applied on the PCB adapters, even if by rated voltage they fall under the scope of the Low Voltage Directive 2014/35/EU.

Technical characteristics

Number of contacts: 7

EN/IEC 61984 ratings: **7,5 A 250 V 4 kV 3**

Lower and Upper Limiting Temperatures (LLT, ULT):
-40 °C ... +125 °C

NOTE – The adapter insulating material is able to withstand wave soldering of the PCB.

CAUTION – The layout of the PCB for this adapter must foresee a suitable pass-through hole for the PE wiring coming from the screw-type PE terminal of CQF /M 07 connector. This adapter does not foresee a PE connection. It is important to fulfil the continuity of PE connection of the CQF /M 07 connector, also for the possibility to use a metal housing.

+ 2× CIF 2.4, 6P interface adapter)
for MIXO CX 17 DF/M module

Find more
information on
our products at
www.ilme.com

TECHNICAL FEATURES

CIF X17 2.4

CIF X17 2.4 **[complete set of 2× CIF 2.4 + new CIF 5 2.4]**

Interface PCB adapter for up to 2,4 mm thick PCBs, gold plated contacts suitable for high-density MIXO module **CX 17 DF/ DM**.

CIF 5 2.4 **[5P interface adapter alone]**

For customers already using **CIF 2.4*** available also as **CIF 5 2.4**, stand-alone additional 5P interface adapter, to be completed by 2× CIF 2.4.

* See CN.19 p. 670, 6-pole PCB adapter, suitable in multiple units to provide PCB interface for series **CDD** inserts size **24** (4 units) **42** (7 units), **72** (12 units) and **108** (13 units), the 24-pole section of combined connector inserts CX 8/24 (3 units) or the 36-pole section of CX 6/36 (6 units), and MIXO **CX 12 DF/ DM** modules (2 units), see CN.19 p. 281.

The new 5-pole interface adapter connector **CIF 5 2.4** of series **CIF**, once mounted in-between 2× **CIF 2.4**, 6-pole interface adapter connectors, forms a 17-pole PCB interface “block” equipped with female gold-plated contacts with rear post for soldering to the PCB.

Either so grouped, or conveniently purchased in the dedicated complete set **CIF X17 2.4**, it serves as interface for either a male or a female high-density module **CX 17 DF** or **CX 17 DM** of series MIXO, each equipped with corresponding interface contacts **CDFA 6A** or **CDMA 6A32** (silver plated) with rear post Ø 1 mm suitable for mating with the CIF adapter female contacts.

RoHS: compliant with exemption **6(c)**.
